

Germann Instruments Hydraulic Pullmachine with Electronic Microprocessor Gauge

for

BOND-TEST, LOK-TEST and CAPO-TEST

Only one machine used for all three types of tests

BOND-TEST

LOK-TEST

CAPO-TEST

Featuring:

- Testing range 0-100 kN
- Internal gauge accuracy 0.01 kN
- Digital readout for each 0.1 kN
- Max. hold position
- Storage of test results for later printout and documentation
- Comes calibrated to tensile/adhesion strength (BOND-TEST) or compressive strength (LOK-TEST and CAPO-TEST)
- Also used for proof-loading of anchors or shear strength (TORQ-TEST and DSS-TEST)
